

BEAVER CREEK PARK

FARMINGTON, NEW YORK

COMPLETION DATE
2022

LOCATION
Farmington, New York

CLIENT
Town of Farmington

Having worked with the Town of Farmington on numerous projects, including the Beaver Creek Park Master Plan, MRB Group was selected to complete architectural and engineering services related to the planning and design of Beaver Creek Park. The 40-acre town park is located in the Auburn Meadows and Estates of Beaver Creek developments.

MRB Group provided concept studies, design development, construction documentation, project bidding, and construction administration phase services on this multi-contract project.

The design of Beaver Creek Park addresses both passive and active recreational needs. The park includes a baseball field, multiple soccer fields, tennis and basketball courts, nature trails, playgrounds, EV charging stations, a picnic pavilion, a public restroom, and a maintenance/storage building.

Special consideration was given to address neighborhood concerns regarding privacy, views, and noise. Berms, farm field vegetation buffers, extensive plantings, and stormwater bio-retention areas all contribute to effective and attractive design solutions.
