

DR. DiMARTINO DENTAL OFFICE

FARMINGTON, NEW YORK

COMPLETION DATE

2019

LOCATION

Farmington, New York

CLIENT

Dr. DiMartino

MRB Group was selected to assist Dr. DiMartino with developing the design for his relocated dental practice on a prominent building site in Farmington, NY. MRB Group's in-house architectural, structural, and site development teams collaborated to deliver conceptual design through bidding services for this 3,800 sf new construction project. Input was gathered from the owner and clinical and administrative staff. The comprehensive programming effort focused on the practice to create a functional, efficient, client-friendly professional office and collaborative workspace, while providing the necessary privacy where needed.

Finishes provide functional, easy-to-clean, and attractive spaces for the crews to work within, reducing maintenance costs, and creating a facility the fire company is proud to share with the community.

The final design was carefully crafted to be both technologically innovative, yet inviting. It included a thoughtful layout, stimulating details and finishes that are attractive and appropriate for the health-care industry.

Special attention was paid to managing acoustics as well as visual privacy.

The office spaces include: an open and welcoming reception space, waiting area, operatories, hygiene rooms, a centralized sterilization area, breakroom / kitchen, private offices, storage spaces and a dental lab.
