

# VETERANS MEMORIAL PARK POOL HOUSE

SARDINIA, NEW YORK

COMPLETION DATE  
2022

LOCATION  
Sardinia, New York

CLIENT  
Sardinia, New York

While many public facilities were closed during the 2020 pandemic, the Town of Sardinia took advantage of the opportunity to move forward with several major renovations at its local parks.

MRB Group had previously been asked to provide conceptual designs and estimates for upgrades to the Veterans' Memorial Park facilities. However, necessary renovations that would bring the existing structures to modern standards were deemed too costly.

In the early spring of 2020, MRB Group's team prepared a design for the complete replacement of buildings, bringing the municipal facilities into full compliance with the Americans with Disabilities Act (ADA). The plans were approved to include demolishing existing structures and constructing improved and expanded facilities.

Working closely with town officials and architectural sub consultant Wolfe Architecture, MRB Group created detailed plans and specifications for two locker rooms (including ADA-compliant bathrooms), mechanical and storage space for pool operations, and a lifeguard station/office.

MRB Group's team provided the following services for this project:

- Initial facility evaluation / assessment
- Architectural programming
- Demolition plans
- Complete architectural design / plans
- Structural and MEP layout
- Civil/site plans, including grading and utilities
- Septic system upgrade for increased capacity
- Construction administration during complete construction schedule (10 months)

**MRB** | *group*

Though the pandemic impacted the completion schedule, MRB Group worked diligently with town officials to deliver the project in time to welcome residents for the community's summer season of 2022.
